DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 June 2004 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-23 and 25 are rejected under 35 U.S.C. §102(b) as being anticipated by Béchade (USPN 5,789,966 - cited by Applicant). Béchade discloses, in Fig. 2, a circuit comprising: “a first passgate (I0 and I1)”; “a first default circuit (22 and 28) in 20’); “a second passgate (I2 and I3)”; “a second default circuit (22 and 28 (28 not shown, but disclosed) in 20’))”; and “a output logic circuit (24 and 26)”, all connected and operating similarly as recited by Applicant.

With respect to claim 25, it is clear from the reference to Béchade, particularly from the claims, that any number of passgate circuits is intended.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Béchade. The above discussed circuit to Béchade does not expressly disclose using a “NOR gate”. However, it is notoriously well known in the art to manufacture an OR gate, as shown for 28, using a NOR gate and an inverter. Such a structure is known to have simple construction with low threshold loss. Therefore, it would have been obvious for one skilled in the art to use a NOR gate with an inverter for OR gate 28 of Béchade to obtain the expected advantage of simple construction with low threshold loss.

Examiner has fully considered Applicant’s remarks for the above rejection and has not found them to be persuasive. Applicant argues concerning the new phrase “a wide multiplexer having a wide bit-width input, but in which the response of the multiplexer is achieved with minimal time delay”. Examiner initially responds by stating that both the terms “wide” and “minimal” lack relativity. Clearly, inverters are generally considered high-speed and, thus, would provide “minimal time delay”. Further, nowhere is the specification seen to provide an express and specific definition for the phrase “wide bit-width input”. Examiner contends that the broad disclosure of Béchade, showing minimum of two bits for each signal, would more than reasonably be considered to be a “wide bit-width input”.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

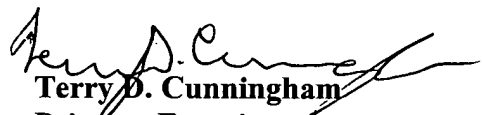

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
